

PDG PROCUREMENT OUTLOOK
(As of August 2017)

Los Angeles World Airports (LAWA) knows it must successfully partner with the consultant and contractor communities to meet our vision of “Gold Standard Airports – Delivered”. Therefore, this Procurement Outlook is provided to give prospective partners an earlier opportunity to plan and prepare for procurements related to the implementation of LAWA’s Capital Improvement Program (CIP) for both Los Angeles International Airport (LAX) and Van Nuys General Aviation Airport (VNY).

LAWA is committed to local, small, and disabled veteran business enterprise participation. As projects move through the definition process, specific participation goals are established based on sub-contracting opportunities. These goals are detailed in the procurement documents. All Planning and Development Group (PDG) procurements are advertised through the Los Angeles Business Assistance Virtual Network at <https://www.labavn.org/>.

LAWA reserves the right to utilize existing contracts and/or in-house resources to perform design and construction services. All projects require further definition and environmental approval and therefore are subject to change with regard to cost, schedule, and delivery method.

ESTIMATED TOTAL PROJECT COST	PROJECT NAME & DESCRIPTION	ANTICIPATED ADVERTISEMENT <i>(Subject to Environmental Clearance)</i>
PROFESSIONAL SERVICES - Planning or Design		
	Recycled Water Extension	
<\$10M	<i>This project will complete the Recycled Water (RW) piping and building connection infrastructure on the LAX campus to receive and distribute advanced treated recycled water to be produced at the Hyperion Water Reclamation Plant.</i>	Q4 2017
	Secured Area Access Post (SAAP) -Westside	
	<i>This project will construct a Secured Area Access Post (SAAP) on the Westside of the LAX campus.</i>	Q3 2017
	Engineering Design Services	
\$10M - \$100M	<i>Professional engineering design and planning services, to study, plan, review and define proposed improvements for LAWA owned assets, on an as-needed basis.</i>	Q4 2017
	CTA Domestic Water and Fire Water Pipe Replacement	
	<i>This project replaces the existing domestic water and fire water infrastructure in the Central Terminal Area (CTA), provides dual branch pipelines and valves to each terminal, and "smart" water meter for each terminal and building.</i>	Q2 2018
	North Airfield Exit Taxiways	
	<i>This project constructs new exit taxiways connecting Runway 6L-24R and Runway 6R-24L.</i>	Q1 2018
>\$100M	Facility Maintenance Yard <i>This project involves phased construction, relocation of and consolidation of existing Facilities Maintenance and Utilities (FMUG) facilities and procurement services warehouse.</i>	Q1 2018
